WateReuse Association Water Week 2019 Congressional Briefing

Next Generation Water Management:
How Water Reuse is Taking Hold Across the Country

Date: April 3, 2019

Time: 10:00 – 11:00 am

Location: SC-4 in the United States Capitol Building

Communities across the country are incorporating water reuse into their water management strategies as a proven method for ensuring a safe, reliable, locally controlled water supply—essential for livable communities with healthy environments, robust economies and a high quality of life.

In some communities, recycled water can create a resilient and drought-proof water supply. In other communities, water recycling protects sensitive waterways and alleviates over-burdened centralized treatment facilities. Please join us for a Congressional briefing discussing how communities across the country are using water recycling to better manage their local water resources and plan for the future.

Water reuse projects – including those supported by the Bureau of Reclamation's Title XVI Program, the EPA's Clean Water State Revolving Fund, and other federal programs – have a proven track record of success. As we continue the conversation about our nation's infrastructure needs, it is critical that we keep water reuse in the picture as an efficient and effective way to meet economic, public health, and environmental goals concurrently.

This Congressional briefing will highlight how utilities across the country are using water recycling in a variety of ways to produce a multitude of benefits for their residents.

Panel Speakers:

- Paul Jones, General Manager, Eastern Municipal Water District, CA (Moderator)
- Alan Weland, VP/General Manager, SUEZ Water Long Island
- Gilbert Trejo, Chief Technical Officer, El Paso Water
- Martha Tremblay, Technical Services Department Head, LA County Sanitation Districts

If you are unable to attend the briefing in person, you can access a livestream at: **https://www.pscp.tv/WateReuseAssoci/1rmxPmmzDegKN**.

Note: Attendees who are not Congressional staff should enter through the Congressional Visitor's Center and ask security for directions to SC-4.
