

Contents

Foreword	ix
Acknowledgements	xi
I. Introduction	1
II. Water Reuse System Planning	2
A. Identify Quantity of Reclaimed Water Available	2
B. Screen All Existing and Potential Future Users	3
C. Identify Potential Users	3
D. Determine If Users Will Accept Reclaimed Water	4
E. Compare Supply to Potential Demand	4
F. Prepare Distribution System Layout	4
G. Finalize Customer List	4
H. Determine Economic Feasibility	4
I. Compile Final User List and Distribution	5
J. Prepare Point-of-Sale Facilities	5
K. Obtain Regulatory Approval	5
L. Perform Onsite Retrofits	6
M. Perform Cross-Connection Tests	6
N. Begin Delivering Water	6
III. Design	7
A. Offsite Design Criteria	7
1. Geometry	7
2. Pumping	9
3. Pipe Materials	9
4. Storage	10
5. Reclaimed Water System Design Standards	10
6. Water Quality Impacts on Pipeline Materials, Reservoir and Storage Tank Sizing, and Turnover Requirements	12
7. System Pressure	13
B. Onsite Reclaimed Water Systems	13
1. Onsite System Design Criteria—New Reclaimed Water Systems	13
2. Irrigation Pipe	14
3. Sprinklers	15
4. Quick-Coupling Valves	15
5. Valve Boxes and Warning Tags	16
6. Backflow Prevention Devices	17
7. Drinking Fountains	17
8. System Identification	17
9. System Component Labeling	17
10. Engineer’s Report	17
11. Cross-Connection Testing	18
C. Onsite System Design Criteria—Retrofit Reclaimed Water Systems	18
D. Sprinklers	19
E. Quick-Coupling Valves	19
F. Valve Boxes’ Marking and Warning Tags	19
G. Backflow Prevention Devices	20

H. Drinking Fountains	20
I. System Identification	20
J. System Component Labeling	20
K. Engineer’s Report	20
L. Cross-Connection Testing	20
IV. Construction	21
A. General Construction Activities	21
B. Color-Coding Systems, Water Signs, and Labels	21
C. Pressure Testing and Flushing with Reclaimed Water	21
V. Operations	22
A. Offsite System Operations	22
1. Maintaining Distribution System Chlorine Residuals	22
2. Seasonal and Daily Variation in Demand Patterns	22
3. Water Quality Testing Requirements	23
4. Effect of Reclaimed Water on Different Operating Equipment	23
5. Regulatory Agency Requirements for Reclaimed Water Equipment Disinfection	23
6. Backflow and Cross-Connection Testing Requirements	24
7. Staff Training	24
8. Cleaning Reclaimed Water Reservoirs	24
9. Cleaning Reclaimed Water Pipelines	25
10. Public Notice	25
B. Onsite System Operations	25
1. Irrigation Hours	26
2. Ponding and Flooding	26
3. Adjusting Sprinklers	26
4. Monitoring	26
5. Rules and Regulations	26
6. Control Measures	27
7. Coverage Test (Onsite Irrigation Systems)	27
8. Onsite User Supervisor	27
9. Cross-Connection Control and Emergency Response Plan	28
VI. Development of a Financing Plan	29
A. Costs	30
B. Cash-Flow Analysis	31
1. The Small Project Financial Analysis (500 AFY)	31
2. The Medium-Sized Project Financial Analysis (5,000 AFY)	32
3. Findings	33
C. Comparison of Financing Alternatives	34
D. Water and Wastewater Revenues	37
1. Operating Budget and Cash Reserves	37
2. Local Property Taxes	38
3. Water and Wastewater Rates	38
4. Special Assessments or Special Tax Districts	39
5. Water Standby Charges	39
6. Developer Connection Fees	39
7. Meter Maintenance Charges	40
8. Reclaimed Water User Charges	40

E. Dual-Purpose Agencies	40
1. Allocating Costs between Water Supply and Wastewater Disposal	40
2. Differential Pricing for User	42
F. Phasing and Participation Incentives	42
G. Other Issues for Adopting Water Rates and Pricing Policies for Reclaimed Water	42
1. Customer Acceptance	42
2. Reclaimed Water Costs vs. Local Groundwater Costs	43
3. Reclaimed Water Rates outside an Agency’s Service Area	43
4. Onsite Plumbing Retrofit Fund	43
5. Lateral Pipeline Extension Policy	44
VII. Public Outreach	45
A. When to Start the Outreach Program	46
B. The Preliminary Public Outreach Checklist	47
C. Developing a “Project Story”	47
D. Developing a Strategic Outreach and Marketing Plan	48
1. Introduction	49
2. Situational Analysis and the Project Story	49
3. Outreach and Marketing Goals	49
4. Challenges and Opportunities	50
5. Key Outreach Messages	51
6. Stakeholder Groups	51
7. Strategies for Stakeholder Groups	52
8. Communication Materials and Advertising	57
9. Timeline	59
10. Budget	59
11. Common Strategies for Success	59
12. List of Resources for More Information	61
VIII. Regulatory Compliance and Health Protection	62
A. Uses of Reclaimed Water	62
B. Regulatory Compliance	62
1. Water Rights	63
2. NEPA	65
3. Clean Water Act	65
4. SDWA	65
C. Factors and Constituents That Affect Water Reuse Regulations/Guidelines	66
D. Difference between Water Reuse Regulations and Guidelines	68
E. USEPA Guidelines for Water Reuse	68
F. Reclaimed Water Regulations	68
G. Indirect Potable Reuse	69
H. Miscellaneous Reclaimed Water Applications	72
1. Wetlands	72
2. Industrial Uses Other than Cooling	73
3. Other Nonpotable Uses	73
I. Treatment, Water Quality, and Other Requirements	74
1. Treatment Process Requirements	74
2. BOD, TSS, and Turbidity Requirements	74
3. Coliform Bacterium Limits	74
4. Disinfection Requirements	75

5. Treatment Facility Reliability	76
6. Use Area Controls	76
7. Storage Requirements	77
8. Reclaimed Water Application Rates	77
9. Monitoring	77
10. Mandated Reuse	78
11. Local Ordinances and Agreements/Contracts between Producer and User	79
IX. Institutional and Organizational Issues	82
A. Institutional Framework	82
B. Compliance and Enforcement	82
C. Staff Training	83
D. Policy and Procedure Manual	83
E. Developing the Nonpotable Water Infrastructure	83
1. Plan Checking	83
2. Field Site Inspection	84
3. Record Drawings	84
4. User Site Documentation	85
5. Service Connections—Application Procedure	85
6. Permits	86
7. System Operations and Maintenance	86
8. Liability	86
Appendices	
Appendix A Table of Acronyms and Abbreviations	87
Appendix B Examples of Offsite Reclaimed Water Specifications	88
Appendix C Examples of Onsite Reclaimed Water Specifications	89
Appendix D USEPA Guidelines for Water Reuse	90
Figures	
Figure III-1 Separation Criteria	8
Figure III-2 Reclaimed Water Color Coding	9
Figure III-3 Reclaimed Water Warning Sign	17
Figure III-4 Reclaimed Water Spray Head	19
Figure VI-1 California State Water Resources Control Board Funding Process Diagram	36
Tables	
Table VI-1 Financial cash-flow analysis (500-AFY Small Project)	32
Table VI-2 Financial cash-flow analysis (5,000-AFY Medium Project)	33
Table VIII-1 Uses of reclaimed water	62
Table VIII-2 Factors affecting water reuse regulations	66
Table VIII-3 Constituents of concern in water reclamation and reuse	67
Table VIII-4 Examples of state water reuse criteria for selected nonpotable applications	70
Table VIII-5 Items typically included in producer/user agreements/contracts for reuse of reclaimed water	80
