

**WaterReuse Association
Northern California Chapter Meeting
Friday, December 4, 2015, 8:30 AM – 1:00 PM
Amador Ranch Center at Rancho San Ramon Community
Park
2000 Rancho Park Loop Rd., San Ramon, CA 94583**

**Preparing for the Future
AGENDA**

8:30 – 9:00	Breakfast/Refreshments
9:00 – 9:15	Welcome Curtis Lam, President, Northern California Chapter of WaterReuse Daniel McIntyre, Engineering Services Manager, Dublin San Ramon Services District
9:15 – 9:45	Zone 7 Water Supply Evaluation Brad Ledesma, Associate Engineer, Zone 7 Water Agency
9:45 – 10:15	CCCSD Master Planning for Recycled Water Melody LaBella/Nate Hodges, Central Contra Costa Sanitary District
10:15 – 10:45	Networking Break
10:45 – 11:15	Successful implementation of Direct Potable Reuse Perspectives from Texas, New Mexico, National, and California Andrew Salveson, Carollo Engineers
11:15 – 11:45	Recycled Water Reporting in 2015 UWMPs Tonianne Pezzetti, Department of Water Resources
11:45 – 12:00	Year in Review/Closing Remarks Curtis Lam, President, Northern California Chapter of WaterReuse
12:00 – 1:00	Lunch and Networking

Thank you to the Program Sponsors:

Speaker Biographies:

Daniel McIntyre is the Engineering Services Manager for the Dublin San Ramon Services District (DSRSD). He is a civil engineering graduate of Cal Poly San Luis Obispo, and holds a Master's Degree in Public Administration from Cal State Hayward. Dan has 26 years of experience in civil engineering and public works, including 12 years as a Public Works Director in the Tri-Valley. He has been with DSRSD since early 2015, and is excited with the District's ability to achieve 35% annual water conservation, and more than 20% of total water demands met through the use of recycled water. Dan was instrumental in the development of the Tri-Valley Water Policy Roundtables, a series of meetings of elected officials from six agencies from 2014-present to discuss water policy issues, including alternative water supply options such as indirect potable reuse.

Tonianne Pezzetti is an Engineering Geologist with the the Department of Water Resources Recycling and Water Desalination Section, where she is actively assessing California's recycling efforts, including evaluating the obstacles and opportunities for expanded use. She is preparing the recycled water section for the 2015 UWMP guidebook and co-authored the Recycled Water Resource Management Strategy for the 2013 Update of the California Water Plan. She is also involved with drought-planning, desalination, and stormwater. Prior to joining DWR in 2010, Toni worked in consulting and the oil & gas industry. She has over 30 years of experience in the water resources industry, including, in addition to her recycled water work, conducting water resources investigations focusing on groundwater, water quality, and water supply management. She is a professional geologist and a certified hydrogeologist, with a bachelor's degree from the University of Colorado and a master's degree from The Ohio State University, both in geology.

Andy Salvesson is a Water Reuse Chief Technologist for Carollo Engineers, Inc. He is leading the planning, permitting, and design of direct and indirect potable reuse facilities across the Southwestern United States. Andy is an independent advisory panel "Expert" for the NWRI-led New Mexico potable reuse regulatory effort and for the NWRI-led Direct Potable Reuse Regulatory Framework, and for the World Health Organization international guidance for potable reuse. Within California, Andy is working with the Santa Clara Valley Water District, the Soquel Creek Water District, Ventura Water, Oxnard, and Los Angeles on potable reuse evaluations and implementation.
