

Central Valley /Sierra Foothills Chapter

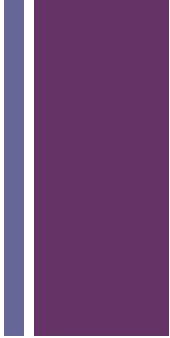

October 19, 2017

ASSEMBLY MEMBER
Bill Quirk
DISTRICT 20

AB 574

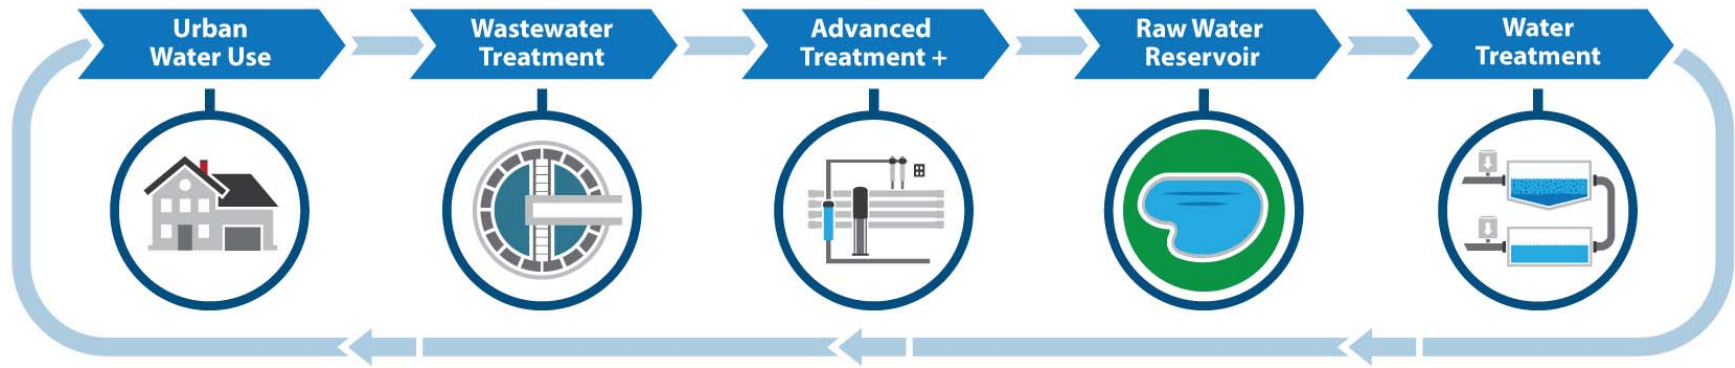

**Advances the use of
recycled water in California.**

Potable Reuse: Newly Defined Types

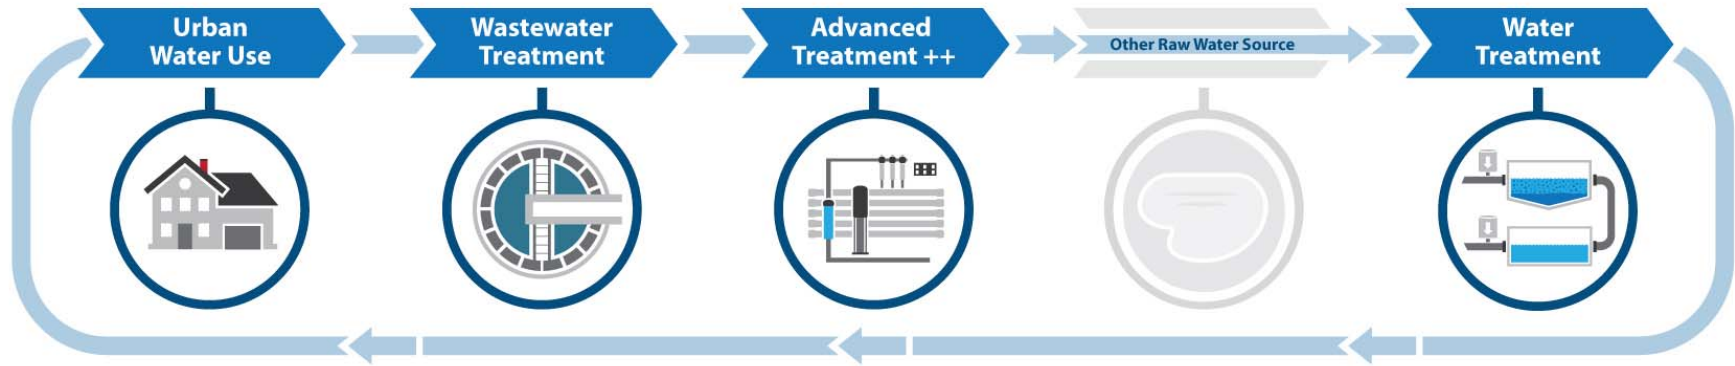

Reservoir Water Augmentation

Potable Reuse: Newly Defined Types

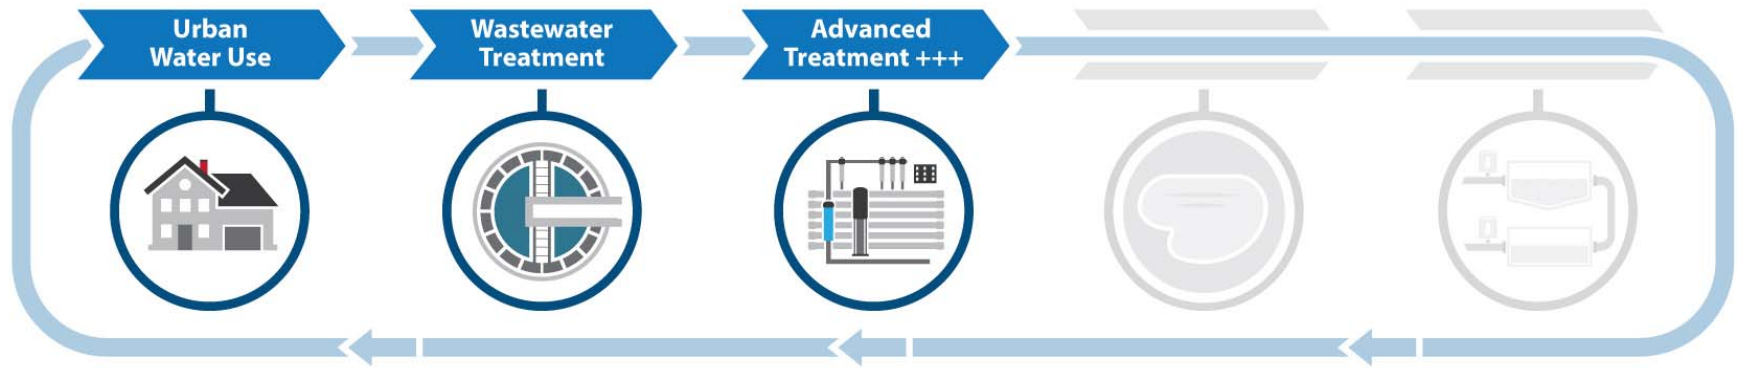

Raw Water Augmentation

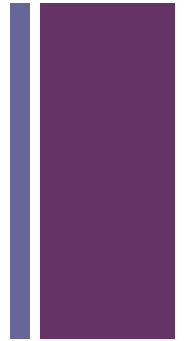

Potable Reuse: Newly Defined Types

Treated Drinking Water Augmentation

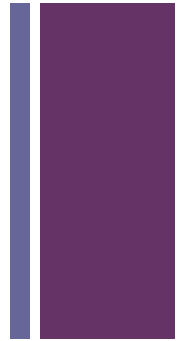

+ Water Board Actions AB 574

- Sets 2023 deadline for Raw Water Augmentation regulation development and adoption
- Expert Panel to assist Water Board in regulation development

+ SB 5 (de Leon) Park Water Bond

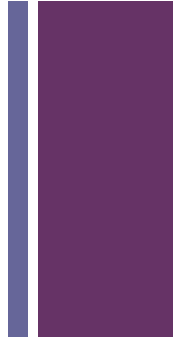

- \$2.5 billion park-water bond for the June 2018 ballot
- \$80 million for recycled water via Water Board recycled water program.
- November 2018 Bond
 - \$400 million for RW

+ AB 967 (Gloria) Signed:
Human Remains Disposal

+ AB 1668 and SB 606 (Conservation)

+ RW Points of Contention

- RW for outdoor irrigation
 - MWELO standard 1.0 ETo for RW
 - Variance needed for high salinity and soil conditions

+ WRCA Work on MWELO Update

- DWR to update MWELO in 2018
- WRCA and NWRI study on 1.0 Eto and need for variance or guidance

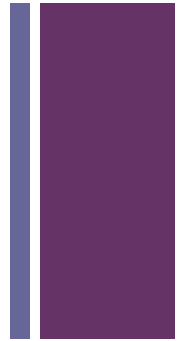

+ Potable Reuse “Credit”

- 10% potable reuse credit. What does this mean??

“An urban retail water supplier that delivers water from a groundwater basin, reservoir that is augmented by potable reuse water may adjust its urban water use objective be a credit calculated pursuant to this division.

- 1) The water use objective credit shall be the volume of its potable reuse delivered, on an acre-foot basis.
- 2) In no case shall the credit exceed 10% of the urban water supplier’s water use objective.”

+ Expands Local Drought Decision Making

- Requires UWMP drought risk assessment
- Allows determination that certain supplies are “fully reliable in a drought”
- Board defers to locally adopted water shortage plans.
