

# Membrane Water Treatment Technology Usage and Needs in the United States

September 7, 2017  
9:30 AM – 11:45 AM

U.S. Department of the Interior  
Secretary's Conference Room,  
5<sup>th</sup> Floor, Room 5160,  
1849 C Street NW  
Washington, D.C.

For communities across America, utilizing membrane technologies is an essential tool to manage water supply and quality challenges as well as promote economic growth, prosperity and security by enabling water reuse. The American Membrane Technology Association (AMTA), Water Environment Federation (WEF) and WaterReuse Association (WRA) are partnering to highlight membrane usage in the United States by showcasing four leading projects. Utility managers and representatives along with manufacturers and researchers will share first hand knowledge of their experiences with membrane technology to treat and produce higher quality water.

After a brief introduction to membrane technology capabilities, there will be project updates by four utilities representing a variety of water and wastewater treatment applications. Discussions will include membrane use and efforts on emerging contaminants of concern, indirect reuse and operations utilizing membranes, seawater desalination as well as inland desalination and concentrate issues. Then four major membrane system suppliers will discuss recent innovations and issues related to membrane usage. Attendees will also be given the opportunity to engage with the presenters to discuss how membrane technology can help address the nation's water supply and quality challenges.

## Presenters:

Rebecca Wilder	<i>Assistant Facilities Manager, Town of Jupiter, FL</i>
Michael Markus	<i>General Manager, Orange County Water District, CA</i>
Christine Owen	<i>Water Quality Senior Manager, Tampa Bay Water, FL</i>
Hector Gonzalez	<i>Government Affairs Manager, El Paso Water Utilities, TX</i>
Cedella Beazley	<i>Commercial Director for the Americas, Dow Water &amp; Process Solutions</i>
Ben Soucy	<i>General Manager of Memcor Products, Evoqua Water Technologies</i>
Dr. Geert-Henk Koops	<i>Technology Leader UF/MBR, GE Water and Process Technologies</i>
Lynne Gulizia	<i>Sales Director-Americas, Toray Membrane USA</i>

## Please RSVP to:
