General Information

EXHIBIT HALL HOURS

Sunday, March 17  3:00 p.m. – 6:30 p.m.
Monday, March 18  7:30 a.m. – 3:30 p.m.
Tuesday, March 19  9:30 a.m. – 2:30 p.m.

WELCOME RECEPTION
Sunday, March 17
5:00 p.m. – 6:30 p.m.
Grand Ballroom E - G

California has a rich 100-year history of using recycled water for agriculture. At the welcome reception meet our exhibitors while sampling delicious food grown with recycled water. Learn about agricultural reuse in California and Orange County.

PRESIDENT’S RECEPTION AT THE FIFTH
Monday, March 18
5:30 p.m. – 7:30 p.m.
The FIFTH Rooftop Bar
Grand Legacy at the Park
1650 S. Harbor Blvd., Anaheim, CA 92802

We hope you will join us on Monday evening for this fun-filled networking reception at Anaheim’s only Rooftop Restaurant & Bar. Shuttle buses will be departing from the hotel starting at 5:00 pm and run continuously to The FIFTH and back to the hotel until 8:00 pm.

CONFERENCE WIFI
Stay connected at the WateReuse California Conference thanks to Water Systems Consulting, the official Conference Wi-Fi Sponsor.
CONFERENCE MOBILE APP

The Conference Mobile App provides easy-to-use interactivity that will enhance your conference experience:

- Browse the technical program by time, speaker or track and create your own personalized agenda
- View speaker bios and communicate directly with speakers on the app
- Rate the sessions you attend and comment on them, too
- View and download the technical presentations and papers from the app
- Locate sessions with the interactive maps feature
- Connect with Sponsors and Exhibitors and view or download their handouts
- Receive important real-time communication during the Conference
- Connect with other attendees based on interests and areas of expertise
- Attendee to Attendee messaging through private messaging within the app
- Interactive Activity Feed where attendees can post, comment on, or “like” other posts
- Share your thoughts about the conference on Facebook, Twitter and LinkedIn right from the app

SESSION AND PRESENTATION SURVEYS

Your feedback is important to us so please remember to rate each of the sessions and/or presentations that you attend. Surveys for each session and/or presentation can be found on the Conference Mobile App.

POWERPOINT PRESENTATIONS

PowerPoint Presentations can be found on the Conference Mobile App under each Session and Presentation.

CEUs AND PROFESSIONAL DEVELOPMENT HOURS (PDHs)

The WateReuse California Annual Conference is pleased to offer Professional Development Hours (PDHs) for all states and Continuing Education Units (CEUs) in the state of California.

How many educational credits can I earn at the California Annual Conference?

By attending all sessions on Sunday, Monday, and Tuesday, you can earn up to 1.5 Continuing Education Units (CEUs) and 15 Professional Development Hours (PDHs).
How do I earn educational credits at the California Annual Conference?

In order to receive **CEU credit**, you will be required to sign-in and sign-out of every session you attend. If you forget to sign-in or sign-out of a session, you will not receive credit for that session; you must do both at every session you attend.

In order to receive **PDH hours**, you will need to complete the PDH form located in your registration packet. These forms can be dropped off at one of the drop boxes located throughout the conference or mailed to the WateReuse office after the conference.

**When will I receive credits for the California Annual Conference?**

Certificates and transcripts will be made available to participants electronically within 8-10 weeks after the Conference. Please keep in mind that, although WateReuse does provide these files, most states will require the individual licensee to report continuing education credits.

In California, this will need to be done directly with CWEA.

**General Information**

Terminology and education credit requirements and restrictions vary widely. All participants are responsible for checking with their license/certification authority to ensure that the WateReuse technical concurrent sessions meet specific requirements.

**CEU and PDH Credit Calculations:**

1.0 CEU = 10 Hours of session time
1.0 PDH = 1 Hour of session time
1.0 Contact Hour = 1 Hour of session time

For Example: 1.2 CEU Credits = 12.0 PDH Credits or 17.0 PDH Credits could equate to 1.7 CEU Credits depending on individual state regulations.
**Plenary Sessions**

**OPENING SESSION**

Monday, March 18  
8:30 – 9:30 a.m.  
Room: Grand Ballroom A-D

**Peter H. Gleick**  
*President Emeritus and Co-founder, Pacific Institute*

Dr. Peter Gleick is a scientist, innovator, and communicator on water and climate issues and a long-time advocate for a sustainable water future in California and worldwide. In 1987 he co-founded the independent thinktank Pacific Institute, which he led as president until mid-2016, when he became president emeritus. Dr. Gleick received the prestigious MacArthur “genius” Fellowship and is an elected member of the U.S. National Academy of Sciences. He is a Fellow of the American Association for the Advancement of Science, and winner of the Ven Te Chow Award from the International Water Resources Association and the United States Water Prize from the US Water Alliance. Dr. Gleick developed one of the earliest assessments of the consequences of climate change for water resources, assessed the risks of conflict over water, and helped to define basic water needs and the human right to water – work that has been used by the United Nations and in human rights court cases. He has pioneered and advanced the concepts of the “soft path for water” and “peak water.”
Awards Luncheon and Presentation

Monday, March 18
12:00 – 1:30 p.m.
Room: Grand Ballroom A-D

The Awards Luncheon will recognize excellent water reuse, reclamation, and recycling projects and practitioners. The California Section of the WateReuse Association will present the following Awards of Excellence during the luncheon on Monday:

- Recycled Water Agency of the Year (Large, Medium, and Small)
- Recycled Water Community Outreach/Public Education Program of the Year
- Recycled Water Advocate of the Year
- Recycled Water Customer of the Year
- Recycled Water Staff Person of the Year
- Lifetime Advocacy Award
- President’s Award

Gordon Cologne Breakfast

Tuesday, March 19
8:00 – 9:30 a.m.
Room: Grand Ballroom A-D

Join us for a celebration of the founders of WateReuse! 2019 marks the 30-year anniversary of the association, which will be recognized at the WateReuse national symposium San Diego this September. In an interview with Peter MacLaggan learn about the mavericks that started the WateReuse Association and who inspired a legacy of laws, regulations and public acceptance that help guide the reuse industry today.

Presentation of the Gordon Cologne Awards to the Founder of WateReuse Association Presentation of Lifetime Achievement Award

Legislative Update

California has a new Governor and Legislature. 2019 will be a pivotal year for California water policy and reuse. Hear from WateReuse (WRCA) legislative advocate (Beth Olhasso, West Coast Advisors) on the latest in the what is happening inside the state Capitol and within Governor Gavin Newsom’s Administration. Hear about WRCA new efforts to define potable reuse terminology, push forward Title 22 non-potable reuse changes and possibly defend water reuse from unnecessarily mandates.
An inclusive and diverse water sector is necessary to build trust and promote innovation for the future. Increased inclusion of women and a diverse workforce presents an obvious opportunity to encourage innovation and progress business goals alongside social and developmental goals.

This session, led by a professional facilitator, Desiree Adaway, will educate, entertain and provide pragmatic information related to understanding the benefits of equity and inclusivity. Women leaders from the reuse industry will serve as supporting facilitators during a series of exercises, led by Desiree, to stimulate interactive discussions.

The goal of the session is to challenge our membership to look within their organizations, and themselves, to see how they can contribute to supporting an inclusive culture at their organization. Because it’s good for business, it’s good for our employees and it’s good for our communities.
2019 WateReuse California Award Winners

Congratulations to our 2019 WateReuse California Award Winners. Be sure and view the Award Winners icon on the Conference Mobile App where you can find the full award description as well as an informational video they have each put together for the attendees to view.

RECYCLED WATER AGENCY OF THE YEAR – SMALL
City of Malibu

The City of Malibu, California worked with Woodard & Curran to plan and design its first public sewer system, treatment facility, and recycled water system. The resulting Civic Center Water Treatment Facility (CCWTF) is a 500,000 gallon-per-day membrane bioreactor utilizing an ultraviolet (UV) disinfection system to treat collected wastewater. The treated effluent meets high-quality water reuse standards, with the capacity to supply 70 million gallons of recycled water for irrigation purposes. Excess recycled water is dispersed via injection wells to an ancient buried river bed and ultimately to the ocean. Automated and remote access controls minimize the need for continuous onsite operation, and control system programming provided by the design team during construction allowed for unique customization of controls desired by the plant operations teams. The addition of the CCWTF required the city to convert private septic systems to public sewer collection. The new collection system includes 9,000 feet of gravity pipe, 4,500 feet of force main, and two lift stations with organic media odor beds to mitigate odor concerns. High groundwater levels, congested utilities, and poor soils were encountered during the installation process, which required several sections of pipe to be installed utilizing trenchless technology, including both pilot tube guided auger boring and pilot tube guided pipe ramming. Phase 1 introduced 30 commercial/business development parcels to the new collection system, and planning for Phase 2 is underway.

RECYCLED WATER AGENCY OF THE YEAR – MEDIUM
Olivenhain Municipal Water District

Olivenhain Municipal Water District is a public agency providing water, wastewater services, recycled water, hydroelectricity, and recreation to 86,000 customers in northern San Diego County. OMWD began serving 376 acre-feet of recycled water in 2003 and served approximately 3,300 AF in 2018.

Noteworthy accomplishments include:
1. Regional Collaboration – OMWD is the lead agency of the North San Diego Water Reuse Coalition, a collaboration among nine North County agencies that coordinate across jurisdictional boundaries to connect recycled water sources with demands more efficiently and cost-effectively, ultimately reducing potable water use by 46,000 AFY by 2035.
2. State and Federal Advocacy – OMWD actively engages legislators to demonstrate the significant investments by ratepayers in developing drought-resilient supplies and the need for funding, including submitting support letters for reauthorization of WIIN and the reform and revitalization of USBR’s Title XVI program to a competitive grant program. OMWD will help shape recycled water efficiency standards by participating in DWR’s landscape area measurement pilot project and a recycled water variance pilot.

3. Public Education – OMWD’s recycled water program includes facility tours, printed material, news releases, presentations, videos, social media engagement, and partnering with community organizations to communicate the value and importance of recycled water.

4. Community Outreach – OMWD continues outreach efforts to large irrigators on the benefits of retrofitting their systems, including co-hosting free workshops with the City of Carlsbad and in partnership with local irrigation equipment suppliers.

5. Residential Recycled Water Fill Station – Recycled water is available free of charge to all OMWD residential customers.

**RECYCLED WATER AGENCY OF THE YEAR – LARGE**

**Water Replenishment District of Southern California**

The Water Replenishment District of Southern California (WRD) has been a leader in advancing the use of recycled water in Southern California. With large capital projects focused on advanced treatment, innovative planning and strong partnerships, basin management for recycled water storage, expanded use of recycled water for groundwater replenishment, recycled water asset management, and public education, WRD has gone from being the single largest purchaser of imported water to becoming independent of imported water in 2019. Now WRD is focused on helping the pumpers in its service area to decrease water imports and utilize locally produced water supplies.

In 2015, WRD expanded recycled water treatment capacity at the Leo J. Vander Lans Advanced Water Treatment Facility. Not only did production capacity increase from 3 MGD to 8 MGD, but process improvements resulted in significantly less waste. Treated water is used to halt seawater intrusion and protect groundwater levels and quality.

In 2018, WRD built the Albert Robles Center for Recycled Water and Environmental Learning. That facility, now in the final stages of commissioning, produces 13,000 AFY of advanced treated recycled water for use at the Montebello Forebay Spreading Grounds. During wet weather, injection wells will put treated water into the aquifer. This project eliminated WRD’s use of imported water to replenish the Central Basin. Community education and outreach have been key to public acceptance of recycled water. Ideas from local residents are reflected in the creative design, amenities and interpretive features of the Albert Robles Center.
Central Coast Blue

Central Coast Blue is a regional recycled water project that will develop a sustainable water supply and protect the Santa Maria Groundwater Basin. The recent drought drastically impacted water resources for the Central Coast’s Five Cities communities and highlighted the need for a sustainable, drought-proof water source to ensure that reliable water supplies will be available for future extended droughts. Currently, water from the Pismo Beach Wastewater Treatment Plant and the South San Luis Obispo County Sanitation District (SSLOCSDD) treatment plants is being treated and discharged to the ocean. Central Coast Blue will capture this lost water and use it to recharge the groundwater basin, creating a drought-proof, sustainable water supply for the community.

Central Coast Blue will include construction of an advanced treatment facility to treat water from the City of Pismo Beach and SSLOCSD treatment plants to produce purified water that is purer than most bottled waters. The purified water will be pumped to injection wells and injected into the groundwater basin to supplement the natural groundwater supply.

By recharging the local groundwater basin with purified water, Central Coast Blue will provide the Five Cities communities with a constant source of water supply that is independent of climate or environmental factors and can protect the groundwater basin from seawater intrusion.

San Jose State University

San Jose State University (SJSU) has been an exemplary user of recycled water from South Bay Water Recycling for nearly two decades. Some of their already completed projects include using recycled water throughout their entire campus for non-potable uses that include toilet and urinal flushing to, cooling towers makeup, irrigation, and decorative fountains. Going beyond the typical recycled water retrofit to convert existing landscaping from potable water to recycled water, SJSU has been proactive in maximizing the use of recycled water. A perfect example is the SJSU South Campus.

The 62-acre SJSU South Campus houses the SJSU’s Athletic Department and the athletic venues for football, baseball, soccer, track and field, golf, sand volleyball, and tennis. As the sports program grew and existing facilities showed their age, the Spartan Athletics program incorporated recycled water into the future planning of these facilities.

How did recycled water usage grow at SJSU South Campus? In 2014, the architecture firm Gensler formalized a plan for the South Campus site. Each sport had a plan that incorporated state-of-the-art facilities that would elevate SJSU sports efforts. In addition, each project included a review for sustainability features. Recycled water was at
the forefront of each project analysis and SJSU’s commitment to recycled water. Recycled water projects for the new tennis complex, softball facilities, golf course, and soccer facilities have recently been completed. Because of SJSU’s planning and foresight, the entire SJSU campus now uses more recycled water than potable water.

RECYCLED WATER STAFF PERSON OF THE YEAR

Bob Holden, Monterey One Water

EBob Holden is a pioneer recycled water practitioner. Having been on the ground floor of one of the most innovative and large scale agriculture irrigation projects in the world, Bob has been a key advocate for the acceptance of this water source in California and around the world. Bob has now been a part of the next water reuse frontier, indirect potable reuse. Pure Water Monterey is utilizing a variety of wastewaters to provide a viable water supply for the area. Bob is a true professional and outstanding member of the community. He is dedicated to his work, family and the environment. He is a recycled water role model.

RECYCLED WATER ADVOCATE OF THE YEAR

Paula Kehoe and Taylor Chang, San Francisco Public Utilities Commission

Paula Kehoe and Taylor Chang of the San Francisco Public Utilities Commission are leaders in advocating for onsite water reuse. They led San Francisco to become the first municipality in California to adopt a groundbreaking program that encourages buildings to collect, treat, and use non-potable water to meet demands such as toilet flushing and irrigation. The Non-potable Water Program established a streamlined process for allowing water sources like rainwater, graywater, and blackwater to be reused in buildings. Paula and Taylor’s unwavering support and policy actions have resulted in the development of a requirement for new developments to meet their non-potable demands through onsite water reuse. In 2012, they led the SFPUC to pilot the city’s first onsite blackwater treatment to flush toilets, offsetting 60% of the building’s water consumption.

Demonstrating outstanding leadership and innovation, Paula and Taylor are showing how utilities and practitioners can embrace onsite water reuse in the urban environment. They have been instrumental in advocating and supporting policies to facilitate onsite water reuse statewide and nationally. In California, Paula and Taylor led the SFPUC to sponsor Senate Bill 966, which passed in September 2018 and will establish water quality standards for onsite water systems to protect public health. Recognition with this award will help Paula and Taylor continue to inspire communities to consider onsite water reuse as an important and effective strategy and increase their ability to be more resilient in the future.

### 3:30 p.m. - 4:00 p.m.
Part 2: Communications Collaborative Group Workshop continued:

Granted conditions vary throughout the state – geologically, hydrologically, politically and more. Yet some of the same questions come up everywhere and through collaborating with their peers, public affairs professionals can help each other learn about successful approaches and build on those to identify innovative ways to tackle thorny problems all face eventually. There is also a lot of collateral material and related information that has been developed throughout the state, so this Group also offers an opportunity to share resources. In addition, working together will help build the bonds that allow for additional problem-solving exercises in the future.

#### 4:00 p.m. - 4:30 p.m.
**A Review and Comparison of Microbial Risks between Planned and De Facto Reuse**
Jeffrey Soller, Soller Environmental, LLC

**Conjunctive Use Recycled Water Program Water Storage and Ecosystem Benefits**
Dave Richardson, Woodard & Curran

**QMRA 101 – Fundamentals of Planning for, Interpreting, and Utilizing a QMRA**
Andrew Salveson, Carollo Engineers

**Converting an Agricultural Research Facility from Untreated to Recycled Water**
Darren Haver, University of California, Division of Agriculture and Natural Resources
Paul Cook, Irvine Ranch Water District
4:30 p.m. - 5:00 p.m. (Continued)

Facilitators:
Patricia Tennyson, Katz & Associates
Carolyn Schaffer, Metropolitan Water District of Southern California
Rupam Soni, Metropolitan Water District of Southern California
Rebecca Gold Rubin, Soquel Creek Water District

WRCA Legislation and Priorities for 2019 (4:00 - 5:00)

Learn about California legislation restricting wastewater discharges to the ocean and bays and other legislation impacting both potable and non-potable recycled water projects, including WRCA sponsored legislation, AB 292 (Quirk).

Presenters:
Jennifer West, WateReuse California
Dave Pedersen, Las Virgenes Municipal Water District (Chair WRCA Leg-Reg Committee)
Christine Compton, Irvine Ranch Water District, (Vice Chair WRCA Leg-Reg Committee)
Beth Olhasso, West Coast Advisors and WRCA Legislative Advocate
Roberta Larson, California Association of Sanitation Agencies

5:30 p.m. - 7:30 p.m.

President’s Reception at The FIFTH
SPONSORED BY: Xylem, Inc.

Shuttle buses will be departing from the hotel starting at 5:00 pm and run continuously to The FIFTH and back to the hotel until 8:00 pm.

#### A6: Panel Discussion – Trends and Predictions for Recycled Water in California

- **10:00 a.m. - 10:30 a.m.**
  - General Managers and water reuse leaders from across California will look deeply in the crystal ball and describe what they see as the future of reuse in the next 20 years.

  - What will climate change and sea level rise mean for reuse?
  - How will communities plan for drought and uncertain water supplies?
  - What will the regulatory environment look like?

  - **Panelists:**
    - Mike Markus, General Manager, Orange County Water District
    - Norma Camacho, General Manager, Santa Clara Valley Water District
    - Paula Kehoe, Director of Water Resources, San Francisco PUC
    - Devan Upadhyay, Chief Operating Officer, Metropolitan Water District of Southern California
    - Garry W. Brown, Executive Director & CEO, Orange County Coastkeeper

- **11:00 a.m. - 11:30 a.m.**
  - How will automation and technology change our industry?

  - **Panelists:**
    - Jeffery Pasek, City of San Diego’s Public Utilities Department
    - Jim Lozier, Jacobs

- **11:30 a.m. - 12:00 p.m.**
  - Permitting the First Surface Water Augmentation Project: The City of San Diego’s Public Utilities Department

  - Reservoir Modeling for Surface Water Augmentation

  - dprShield: Piloting a New Treatment Process to Increase Recovery at OCWD

  - Erik Desormeaux, Porifera Inc.
**Tuesday, March 19, 2019 (continued)**
