Instructions

To be considered for a technical presentation, submit an abstract online by **October 18, 2019**.

Authors will be notified by **November 25, 2019** if their abstract has been selected and will be required to submit a PowerPoint presentation by **February 28, 2020**.

About the Conference

The conference is designed for individuals, organizations, and agencies that are associated with or interested in the design, management, operation, and use of water recycling facilities and projects in California.

The conference organizing committee is aiming to emphasize the following themes when selecting and organizing abstracts:

1. The role of recycled water in One Water and Sustainable Water initiatives
2. Elected officials: Strategies for engagement and coordination
3. Strategies for successfully delivering recycled water projects and programs, such as project delivery options, system operations, and approaches to inter-jurisdictional partnerships
4. Pathway to potable reuse – What is needed to achieve broad implementation of potable reuse in California – leadership (elected officials and executives), customers, technology, public acceptance, etc.
5. Onsite / Decentralized Reuse
6. Emerging issues in reuse – What's next in our industry?

Conference Attendees

Conference attendees include water recycling leaders, public agency representatives, elected officials, customers, developers, consultants, teachers, operators, environmental groups, students, manufacturer representatives and other individuals interested in engaging in the dialog about water recycling.

Abstract Subject Areas

- The New Age of Potable Reuse
- Expanding an Improving Non-potable Reuse
- Implementing Onsite Reuse (blackwater, greywater, etc.)
- Scalping / Satellite Plants
- Commercial and Industrial Applications
- Treatment: Technologies, Systems, O&M
- Water Quality Issues
- Challenges with Decreasing Wastewater Flows
- Increasing Recovery or Brine Concentrate Minimization/Disposal
- Environmental Enhancement with Reuse
- Climate Change Resiliency (e.g., drought, sea level rise, energy efficiency)
- Sustainable Groundwater Basin Management
- Elected Officials and Agency Perspective
- Regulatory, Policy and Compliance Issues
- Economics, Financing and Funding
- Public Outreach, Education, and Communications
- Lessons Learned, Common Pitfalls, and Barriers to Successful Recycled Water Programs
- Data Collection, Information Management, and Decision Support Frameworks

Proposals for a cohesive panel with a moderator that cover an entire track are encouraged. Panelists will be allowed short introduction (~5 min) with majority of time dedicated to moderator and audience Q&A.
(3 speakers minimum)
