Speaker Biographies:

Kristin White Kristin began her career with Reclamation in 2010 as a hydrologist in the Klamath Basin Area Office in Klamath Falls, Oregon. Since that time, she has served as a modeler, project manager, branch chief and technical expert on various long-term water supply planning efforts for the CVP. Prior to joining Reclamation, White worked as a consultant in Virginia and Texas, focusing mainly in flood control modeling, planning and design. Kristin holds a Bachelor of

Science degree in civil engineering from Florida Institute of Technology, a Master of Engineering degree in civil engineering with an emphasis in water resources from the University of Houston and is a registered Professional Engineer in Texas. She also serves as the Chair of the River Basin Planning, Policy and Operations Committee in the Environmental and Water Resources Institute under the American Society of Civil Engineers. White and her husband, Edward, live in Sacramento and enjoy hiking around the state with their dogs.

Molly White is a Principal Engineer with the Department of Water Resources and is Manager of Water Operations for the State Water Project. Molly manages a team who are responsible for SWP water supply delivery and capability planning as well as scheduling and planning releases from Lake Oroville and SWP Delta pumping. Molly has over 20 years of experience with the State of California, 17 of which have been with DWR.

Steven Ritchie is Assistant General Manager of the Water Enterprise, where he oversees water system operations and planning from Hetch Hetchy through the Regional Water System to the City Distribution Division, and the management of lands and natural resources. He served as Manager of Planning from 1995-98. Previously, he managed the South Bay Salt Pond Restoration Project, a multi-agency effort to restore 15,100 acres of valuable habitat in South San Francisco Bay while providing for flood risk management and public access. He has served in management positions at the San Francisco Bay Regional Water Quality Control Board (1987-95), the CalFed Bay-Delta Program (1998-2000), and URS consultants (2000-04). He holds a B.S. and M.S. in civil engineering from Stanford University
